

Recommended Adhesives and Sealants for PVC Products

Palram Technical Support Department

The information in this leaflet is based on testing carried out in our laboratory or information obtained from a variety of sources over the years. The Palram laboratory will test the compatibility of materials as a service to our customers.

Note that since in general products composition can change in time, PALRAM Industries is not responsible for the results obtained when using these materials.

It is imperative that the manufacturer's instructions be strictly followed. This includes following the required safety procedures. Some products contain organic solvents which have the potential to damage the health of the user if proper safety procedures are not followed.

If you have any comments or questions, feel free to contact your PALRAM distributor.
